

# CATs Preparation and Practice Materials (PPM)

CATs is a multi-level programme. The Preparation and Practice Materials (PPM) develop real-world English skills. They can be downloaded onto an app, used offline, and are self-study to suit different learners. Each level provides comprehensive preparation and practice for CATs tests. They are engaging and keep learners motivated.

## HUNDREDS OF HOURS OF PREPARATION

## TEST

### ONLINE/OFFLINE PREPARATION

On-the-go grammar, vocabulary, reading, writing, listening and speaking practice, and games

### PRACTICE TESTS

Complete online practice tests

#### Preparation and practice

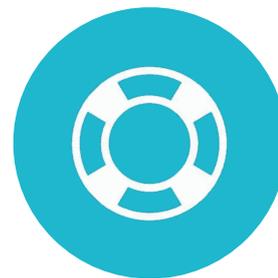

The learning materials are delivered online and can be studied on a wide range of devices (mobiles, tablets, iPads, Chromebooks, PCs/Macs).

The ability to download the materials onto an app means learning can take place offline at a time that suits the learner.

#### The learner journey

Learners take a short placement test when they first begin learning with CATs. They then complete the preparation and practice materials. Regular test practice throughout the units, and complete practice tests, helps them to prepare for the end-of-level test.

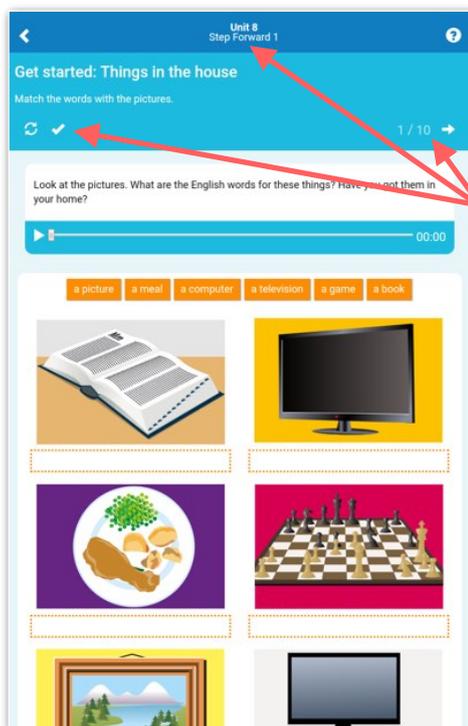

#### Help and support

The self-study materials include a friendly teacher avatar to give learning support. A range of tools and techniques is used to keep learners motivated. Engaging video, audio, games and pictures make learning fun and interactive.

A friendly teacher avatar helps and guides learners through the preparation materials.

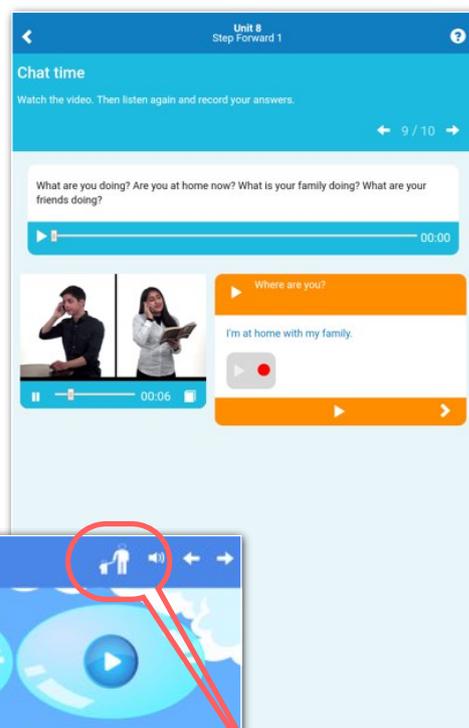

Regular test practice helps learners prepare for the CAT's test.

Each themed unit begins with a 'Get started' activity to introduce the topic.

Learners can check their own progress at any time.

Chat time activities provide role-play and conversation practice to improve speaking.

Content is brought to life by engaging video, audio, games and pictures, appropriate for the age of the learner.

Support for parents is built into the app.
